

# TAIT TRANSPORTABLE REPEATER

## TAKE YOUR RADIO NETWORK WITH YOU

Tait Transportable Repeaters enable responders to extend their wireless radio communications network, or set up a new network on the move, in minutes.

### Proven platform

- All the RF performance and reliability of the TB8100 and TB9100 packaged in a compact case.

### Dynamic response

- Built-in Task Manager can be used to configure alerts, monitor performance and administer the Transportable Repeater remotely.

### Tait Tough

- A briefcase with reinforced metal chassis ensures Tait Transportable Repeaters are built for reliable response to unpredictable scenarios.

### Digital or analogue

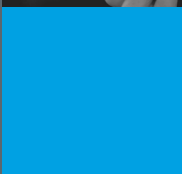

- Transportable Repeaters are available in digital with VoIP networking or analogue aiding interoperable communications.

### Customisable

- Tait solutions are customisable down to the finest detail to suit the application. Pelican cases in different colours can be used to differentiate between frequencies, for example.

### Entire solution

- In addition to base stations, portables, mobiles, accessories and your services needs, Tait will source the right third party equipment.

\* Tait Transportable Repeater was named Hot Product by Public Safety Communications Magazine. Available in VHF/UHF/700/800 MHz

**TAIT: THE RIGHT FIT**
